Subject Information Update - Description has changed: The
Administrator's Meeting with the American Lung Association's
CEO and President, Charles D. Connor

The Call-in number for individuals in RTP will be:

1 [REDACTED]

access code [REDACTED]

Mr. Connor will be accompanied by:

Paul Billings, Vice President of National Policy and Advocacy
Janice Nolen, Assistant Vice President of National Policy and Advocacy

Topics of discussion will include issues of outdoor and indoor air pollution:

- securing a more protective NAAQS, especially for ozone and PM
- protecting local community health from power plant pollution as CAIR is revamped
- beginning work on Tier III controls for motor vehicles and enhanced diesel retrofits
- retaining a focus on human health impacts - climate and energy issues
- enhancing joint ALA/EPA work on indoor air, especially around asthma triggers, secondhand smoke and radon

Thank you.

Subject Discussion with Enviro

To discuss MACT and public health

Hi Ellen,
Here's a list of participants in the meeting with Gina McCarthy at 10:30 on April 23:

Paul Billings, American Lung Association pbillings@lungusa.org
Janice Nolen, American Lung Association jnolen@lungusa.org
David Baron, Earthjustice dbaron@earthjustice.org
John Walke, NRDC jwalke@nrdc.org
Ann Weeks, Clean Air Task Force aweeks@catf.us
Bruce Nilles, Sierra Club Bruce.Nilles@sierraclub.org
Joining by phone: Vickie Patton, Environmental Defense Fund vpatton@edf.org
(possibly by phone) Conrad Schneider, CATF cschneider@catf.us

Unable to attend: Jim Pew, Earthjustice
Frank O'Donnell, Clean Air Watch

I've sent them all appointments for their calendars, so if you want to send me the phone in number, I'll share it with them. Thanks!

Subject ALA requesting another meeting on CSAPR

Hi Joe,

Since Gina granted their request for a meeting on PM, should she grant them this meeting on CSAPR (RICE stuff)?

Thanks!

Cindy

Subject: Requesting a meeting

Hello, Gina, Janet and Peter:

Hope this finds you all well. Could we schedule a meeting to discuss CSAPR/CAIR with you? We're looking for more information about assessing the possible impact of any final court decision to leave CAIR in place. We also would like to share some concerns we have about the RICE/BUGs rule.

Thank you,
Janice

Groups Act to Force EPA to Issue Soot Air Pollution Standards

Stronger particle standards key to limiting dangerous levels that kill thousands every year

Washington, DC - Public health and environmental groups are taking legal action aimed at forcing the Environmental Protection Agency (EPA) to issue new standards to limit levels of soot, smoke, and other airborne particles linked to thousands of premature deaths each year.

The groups sent a “notice of intent to sue” letter to EPA Administrator Lisa Jackson giving EPA 60 days to address EPA’s failure to conduct a mandatory five-year review of the 2006 particulate matter standards, which should have been completed yesterday.

These limits, called the national ambient air quality standards, drive cleanup of pollution across the nation and, by law, must be set to protect public health. The Clean Air Act requires that EPA determine if the standards meet that requirement by reviewing the science every five years.

The letter was filed by Earthjustice on behalf of the American Lung Association and National Parks Conservation Association. In 2006, the Bush Administration ignored recommendations by its science advisors for stronger protections and adopted the current weak particulate matter standards. In 2009, as a result of a legal challenge brought by these groups, a federal appeals court ruled that these standards were deficient and sent them back to EPA for corrective action.

Since then the Obama EPA has failed to propose new standards although the science confirms that particulate matter pollution in the U.S. continues to cause thousands of premature deaths and tens of thousands of hospital visits every year.

“Scientists, medical professionals, the courts and the general public have agreed for years that deadly soot levels are unacceptable for Americans. Our action today demands that EPA adopt the legally-required air quality standards that will save thousands lives,” said Paul Cort, staff attorney for Earthjustice.

“The scientific evidence keeps growing to show that particulate matter is a deadly air pollutant—and that the current standards fail to protect us from that threat,” said Janice E. Nolen, Assistant Vice President, National Policy and Advocacy, for the American Lung Association. “We need EPA to follow the law and finish the job.”

“By adopting more protective soot standards EPA will help clear the air in our national parks at the same time it is making the air healthier for all Americans to breath,” said Mark Wenzler, Vice President for Climate and Air Quality at National Parks Conservation Association.

Airborne particulate matter is comprised of tiny particles of smoke, soot, metals and other chemical compounds emitted from sources like power plants, factories, and diesel trucks. Scientists say particulate matter which can penetrate deep into our lungs, is one of the most toxic forms of air pollution. They estimate that it is responsible for tens of thousands of premature deaths nationwide every year. It is also linked to the aggravation of respiratory illnesses, such as asthma, bronchitis, and chronic obstructive lung disease (COPD), and to heart disease, and lung cancer. Particulate matter is also responsible for much of the haze that clouds many of our cities and parklands.

About the American Lung Association

Now in its second century, the American Lung Association is the leading organization working to save lives by improving lung health and preventing lung disease. With your generous support, the American Lung Association is “Fighting for Air” through research, education and advocacy. Subject: Requesting a meeting with you on PM NAAQS decision

Hello Bob,

We have a group of health and medical society CEOs who would like to meet with the Administrator or you on the upcoming PM NAAQS decision. We have run into some challenges scheduling this on Administrator Jackson's calendar, so I'm hoping we can schedule a time with you or get your help scheduling this with her. We are aware that she will need to make a final decision soon, to send it to OMB for them to review it prior to the decision deadline of December 14. I'm hoping you or Administrator Jackson would have some time for such a meeting next week, so I can get our colleagues' CEOs' calendars also lined up. We met with Gina earlier last month with senior staff from these same groups.

We would greatly appreciate any help you can provide in scheduling this meeting. I'm copying Mr. Lozano of the Administrator's staff, as I explained the urgency of the timing in an email to him as well.

Thank you,
Janice

Hey Cindy,

Once you're back in the office and back on track, please push back on Janice and see if they can do dates later in November. We're still not certain the Admin. will be available, but their chances are definitely better if it's later on in the month.

Subject: Request to schedule a meeting with Administrator Jackson

Hello, Mr. Dubin:

The American Lung Association and other health and medical groups would like the opportunity to meet with Administrator Jackson in early November on the particulate matter national ambient air quality standards. We would appreciate time to share with her our thoughts on the need for strong, protective particulate matter standards before she makes her final decisions on this.

I'm taking the liberty to copy Cynthia Browne in Asst. Administrator McCarthy's office in case my information on the person to contact to schedule this meeting is in error. If so, would one of you please forward this request to the correct person.

Thank you.

Subject: Excellent ATS journal editorial on PM NAAQS

Hello—

Attached is an excellent editorial from the American Thoracic Society's most recent journal, *American Journal of Respiratory Cell and Molecular Biology*, on the need for a much more protective particulate matter NAAQS. I know you'll recognize the authors, the renowned researchers, George Thurston, ScD and John Balmes, MD, who are also long-time American Lung Association volunteers. Please note that they did make one error in this editorial: they cite the decision date as December 15, when we all know it is actually December 14th. Their conclusion is one we strongly agree with:

Based on this available evidence, we support the most protective long-term (annual average) standard at 11 mg/m³ and the short-term (24-h average) PM_{2.5} standard at 25 mg/m³.

Thank you,
Janice
