This amendment also includes a new non-federal cost-share in section 2001 Resiliency and Sustainability grant program of 10 percent for disadvantaged communities or populations of under 10,000; adds language to section 2014, to clarify existing law, that projects eligible for WIFIA assistance as defined under the statute that are also eligible for scoring under the Federal Credit Reform Act (as defined in the 1990 law) are non-federal and eligible for non-cash budgetary scoring, in order to preserve the existing practice of the scoring method used for WIFIA projects; adds language in section 2017 Discretionary Grant Program that clarifies the provision does not increase states' bonding authority in order to prevent scoring issues; clarifies in section 2019 that the Centers of Excellence include the "goal of improving the effectiveness, cost efficiencies, and protection of public safety and water quality in their operations", directs the inclusion of stakeholder consultation, and allows stormwater infrastructure grants to be used not only for developing, but also delivering, educational and training materials; creates section 2022 the Water Reuse Interagency Taskforce to allow the EPA to coordinate with other agencies and develop a plan for opportunities for water reuse.
