RE: Riverside Public Utilities Requests Support for Passive Receiver PFAS Liability Protection

Dear Majority Leader Schumer, Minority Leader McConnell, Chair Carper, and Ranking Member Capito,

Riverside Public Utilities (RPU) respectfully requests your support for PFAS liability protections for water and wastewater agencies under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) that follow all applicable law and regulations for PFAS.

RPU is a publicly-owned utility that provides water and electric services, for over 330,000 residents in the City of Riverside, California's twelfth largest city. The City also operates a regional wastewater treatment facility. Potential liability from a proposed CERCLA hazardous substance designation for PFOA and PFOS, and the associated costs, is a serious concern for RPU, as disadvantaged communities comprise 40% of our service territory.

In September 2022, EPA published a proposed rule to designate PFOA and PFOS as CERCLA hazardous substances. That rule is now in the final stages, currently at the Office of Management and Budget for review and is expected to be finalized before the end of this month. Congress intended CERCLA to be a statute that would allow for the remediation of contaminated sites and ensure the polluters are financially responsible for the cleanup through the "polluter pays" model. RPU strongly supports ensuring the CERCLA "polluter pays" principle remains intact. However, under current federal efforts, ACWA members and their ratepayers will be facing a "community pays" outcome that unfairly shifts the clean-up and liability costs onto water agencies and the public they serve.

Public water and wastewater agencies are passive receivers of PFAS from a vast array of domestic, commercial, and industrial sources. Water systems, and the public, do not have control over PFAS in the environment given the overwhelming presence of this family of chemicals in the chain of commerce and in our homes.

Without an explicit exemption from liability under CERCLA, water and wastewater systems could be held financially liable for tort claims and the cleanup of Superfund sites contaminated with PFAS for merely fulfilling their responsibilities under the Safe Drinking Water Act to treat and dispose of these chemicals to protect public health. While we appreciate that EPA has shared that it does not intend to pursue water systems for cleanup costs, the CERCLA statute leaves those same systems vulnerable to litigation by the polluters themselves through potentially responsible party (PRP) suits. Cleanup costs alone are daunting for many water systems; adding the financial implications of litigation would be overly burdensome for ratepayers.

We ask that the Senate consider and pass legislation that would protect water systems and uphold CERCLA's polluter pays principle. One example of this is Senator Cynthia Lummis' legislation, **S. 1430, the Water Systems PFAS Liability Protection Act**. This legislation would provide the protection that water systems desperately need to face the challenge of PFAS pollution with all the resources they can bring to bear. This legislation would protect water systems, as CERCLA intends, and put the burden solely on polluters – not ratepayers. This will allow water systems to focus on and allocate resources to accomplish their most important goal: providing safe, reliable, and affordable water service to ratepayers.

RPU urges you to uphold CERCLA's "polluter pays" principle and protect water systems and the ratepayers they serve by supporting a tailored legislative exemption from PFAS liability.

Thank you for your attention to this request.

Sincerely,

Todd M. Corbin
City of Riverside
Utilities General Manager
