# Ozone and PM Attainment Forecast with CAIR and with Other Clean Air Programs – Eastern U.S. in 2010

## Ozone and Fine Particle Nonattainment Areas* (April 2005)

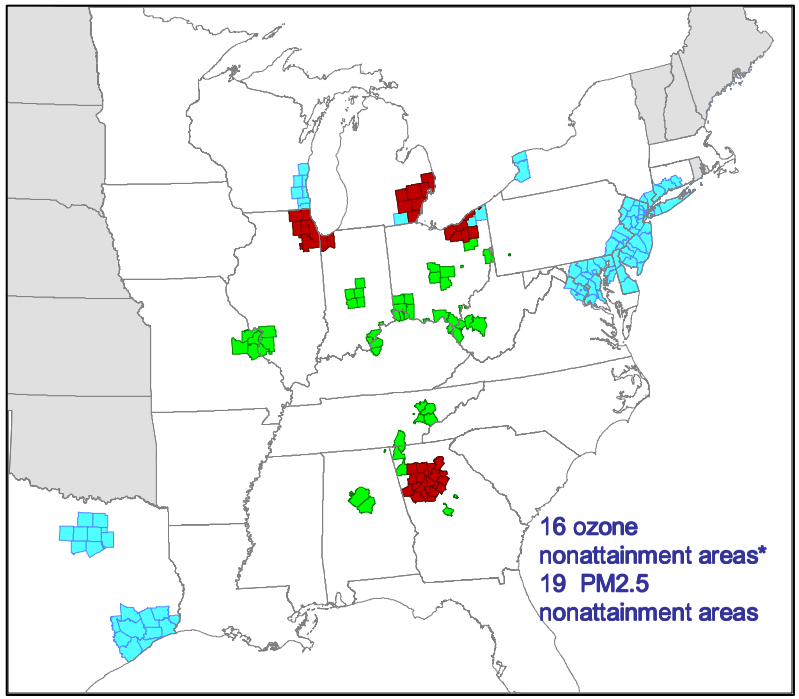

Nonattainment areas for 8-hour ozone pollution only

Nonattainment areas for fine particle pollution only .

Nonattainment areas for both 8-hour ozone and fine particle pollution

## Projected Nonattainment Areas* in 2010 after Reductions from CAIR and Existing Clean Air Act Programs

*Although tallies include all eastern nonattainment areas, the maps show only the nonattainment areas in States covered by CAIR requirements. Four current ozone nonattainment areas in New England are not pictured. Rhode Island (not colored blue) is the 16th area projected to be nonattainment for ozone in 2010.

**Projections concerning future levels of air pollution in specific geographic locations were estimated using the best scientific models available. They are estimations, however, and should be characterized as such in any description. Actual results may vary significantly if any of the factors that influence air quality differ from the assumed values used in the projections shown here.**
